SCHAEFER YACHTS: YOUR OTHER WORLD.

For over three decades, the shipyard has been leading a true revolution in the nautical industry. Throughout these 32 years, we have delivered nearly 4,000 vessels ranging from 37 to 86 feet, redefining international standards of quality, performance, and sophistication.

More than building yachts, Schaefer Yachts designs unique experiences. Every detail—from bold design to advanced onboard technology—is developed with absolute focus on performance, luxury, and safety. This commitment has made Schaefer the largest yacht shipyard in Brazil and a powerhouse in the South American nautical industry.

Among countless differentials are vacuum infusion applied to all parts, an exclusive 5-axis CNC machine, as well as in-house carpentry and upholstery that integrate a highly verticalized production process.

With our production certified by NMMA, a global benchmark in safety, and one of the most advanced manufacturing processes in the world, Schaefer Yachts also stands out in the most demanding international markets. Welcome to your new world.
